U.F.A. Convention

The U.F.A. and U.F.W.A. nominating convention for the Didsbury Constituency will be held at Acme on Tuesday, June 4th at 1 p.m.

A. B. Claypool, M.L.A., the sitting member for this constituency will be a candidate for the nomination, but we understand that other names will also be before the convention.

Delegates to the convention from the Didsbury district will be chosen at a meeting to be held at the Livestock Office, Didsbury, on Saturday afternoon at 2 p.m.

Didsbury Beat Olds 23-3

Playing errorless ball behind the superb pitching of Holub and Berscht, Didsbury had an easy time defeating Olds in the first softball game of the season, the score being 23-3.

Young Holub held the Olds team to scattered hits and 3 runs in six innings, when with the game on ice he was relieved by Len Berscht who held the visitors hit and runless for the rest of the game. Beside his fine performance on the mound, Holub cracked out 2 home runs and a single in five trips to the plate. Brusso also had a home run.

Lack of a capable pitcher was the only weakness on the Olds team. Bob Rowe started the game and was relieved in the fourth by "Duke" Waioman who finished the game. The fielding of Hube Gooder in the right pasture was an outstanding feature of the game.

Didsbury: Berscht, Brusso, Tuggle, Geiger, Morasch, Tittsworth, Buhr, Gulliver, Holub.

Olds: Morrison, Hayes, Gooder, Knight, Wainman, Rowe, Earl, Currie, Watkin, McCall.

Will Hold Silver Jubilee Celebration.

The Silver Jubilee Celebration which was postponed May 6th will be held Monday next, June 3rd, the King's birthday.

The committee met Monday evening and it was decided to carry out the full program as arranged previously.

All the children in the district are invited to take part in the celebration. The Mayor of the town has declared a civic holiday and it is hoped that all trustees will declare a school holiday for that day.

The schoolchildren are asked to meet at the C.P.R. grounds in the morning and coffee will be supplied to the country people from 12 noon.

The Parade will commence at 1:30 o'clock. Headed by the Didsbury Boys' Band the schoolchildren will march in units, accompanied by their teachers, to the school grounds. A contingent of the Canadian Legion will bring up the rear of the procession.

At the school grounds patriotic exercises will be observed and an address will be given by Mr. George Clark, Reeve of Westerdale Municipality.

After the exercises and address sports will be held for the children and ice cream will be served.

All children will be presented with a Jubilee Button in commemoration of the occasion.

A dance will be held at the Opera House in the evening under the auspices of the Boys' Band, the music being supplied by Halliday's Orchestra. Support the Band by your attendance. Gentlemen 50c and ladies 25c, including lunch. Dancing 9 p.m. to 2:30.

Come to town for the whole day and enjoy a respite from your labors.

Pet Show & Parade in the Morning

The Pet Show and Parade which had been arranged by the C.G.I.T. for May 24th, but had to be postponed on account of the weather, will be held in the morning.

Judging will take place at 11 o'clock sharp on the C.P.R. lot and there will be a parade immediately after headed by the Boys' Band.

Boys and girls are asked to bring anything they have to enter into the competition for:

1. Best Pet.
2. Best Decorated Doll or Baby Carriage.
3. Best Decorated Wagon or Tricycle.
4. Best Decorated Bicycle.

There will be two prizes for each event.

A fee of 10c for each entry should be made with Miss Lorraine Gage before 10:30 the same morning.

Social Credit Meeting.

A well attended meeting in the interests of Social Credit was held at the Opera House on Monday evening when Mr. Henry Erb occupied the chair.

Messrs. R. P. Kirk and H. F. Pryor, both prospective candidates chosen at the Didsbury constituency convention, each gave a short address.

The main speaker of the evening was Mrs. Frank Gostick of Calgary. Questions were called for, but very few were forthcoming.

Proclamation

TO ALL LOYAL CITIZENS OF THE TOWN OF DIDSBURY Greetings!

I do hereby, under the powers vested in me by the Town and Village Act, proclaim that Monday the 3rd day of June, 1935, the King's Birthday, be observed as a Civic Holiday within the Town of Didsbury.

GIVEN under my hand at Didsbury, Alberta, this 28th day of May, A.D. 1935.

MAYOR,
Town of Didsbury.

Carstairs Pool Elevator Destroyed

The Alberta Wheat Pool Elevator at Carstairs was totally destroyed by fire Thursday morning last.

The fire was discovered about 3 a.m. but had got such a hold that it was impossible to save the building.

Several box-cars near the burning building were moved to a safe distance and the firefighters devoted their efforts to saving the livestock shed and the Estes building.

There were about 7,000 bushels of grain stored in the elevator. The origin of the fire is not known, but it is believed to have been caused by the wiring or by spontaneous combustion.

Reid Silent on Douglas Report

No announcement regarding details of the interim report submitted to the provincial government by Major C. H. Douglas on the feasibility of applying his social credit scheme in Alberta was made by Premier Reid Monday.

Major Douglas submitted his report to Mr. Reid Saturday.

"The matter has not come before the cabinet yet," the premier reported Monday.

Stores Will Close Half Day Monday

The stores and business houses will be closed on Monday afternoon closing at 12 o'clock noon so as to allow the business men to take part in the Jubilee celebration.

They will also be closed on Wednesday afternoon as usual.

Evangelical Church Notes

The sermon subject next Sunday morning will be on "Grieving the Spirit," and in the evening, "The Christian Life."

The Ladies Aid Society will entertain the congregation at a supper on Wednesday evening, June 5 at 7 o'clock. Following the supper the annual congregational meeting will be held.

CARLSEN-SMITH.

On May 3rd at the Lutheran Church, Macleod, a quiet but very pretty wedding took place when Miss Marvel Jane Smith, eldest daughter of Mrs. Georgina Smith, Didsbury, became the bride of Mr. Nels C. Carlsen of Pincher Creek. The Lutheran Bishop of Lethbridge officiated.

The bride was becomingly gowned in pale pink silk crepe, with accessories to match, and carried a bouquet of roses and lilies-of-the-valley.

Both bride and groom were unattended.

Change Managers at Builders' Hardware

Mr. Barney Klassen, who has been in charge of the Builders' Hardware here for the past two years, has resigned his position with the Company and will leave here this weekend.

Mr. Klassen is going into business for himself and has purchased the Simpson Hardware at Cochrane. During his stay here he has made many friends, and while we are sorry to see him go we wish him success in his new venture.

Mr. E. Watkin has been appointed his successor and takes charge of the store this weekend. Mr. Watkin comes from Olds, where he has lived for the past 26 years. He was educated at the Olds schools and has been in the hardware business for the past ten years. He was assistant in the Builders' Hardware at Olds previous to coming here.

A Fish Story

Oscar Faust, 13, and three others Tuesday claimed to have caught a fish that retrieved a ring that young Faust lost Saturday in Palmerston Lake, near Ottawa. The others are Robert Russell, Arthur Dinelle and M. J. Smith.

They said Faust's silver ring slipped from his finger as he trailed his hand in the water. About a minute later Russell landed a large gray trout. He found the ring in the fish when he opened it.

Your Boys

I have four sons, two of them approaching the age when they must go out and face the earning of a living, writes a man to a newspaper. Is he disturbed and troubled over the prospect of the difficulties which for the time being may confront these young men in obtaining employment and making a start in life? No, he is wise enough and has had experience enough to realize that countless thousands of other young men starting to carve out careers for themselves had to face difficulties and had many obstacles to overcome. No doubt he passed through such experiences himself. It has been the way of the world since time immemorial.

Nevertheless this father of four boys is worried. He has reason to be, and so, too, have other parents all over the land. This man writes that all this recent propaganda, these ever repeated demands, that the Government should guarantee "the security of the home, the security of livelihood and the security of social insurance" causes him to wonder if the prospect of so much sheltering, so much safeguarding, so much financial protection, so much paternalism will cause his boys to discount, disregard, despise his teachings.

I have, he says, tried to impress upon them that they must fit themselves to make their own way in the world, that they must develop self-reliance, that they must cultivate a spirit of manly independence, that they must be prepared to earn every penny coming to them, that they must expect nothing for nothing in this world.

To achieve this, I have emphasized that they must be studious and industrious, that they must exercise rational frugality and self-denial until they have accumulated a competency, that they must aspire not only to take care of themselves and their dependents, but to acquire means to aid generously those who are in need.

I have warned them against extravagance, ostentation, thriftlessness, thoughtlessness, in order that they may escape the hardships and humiliations which befall so many in old age, explaining that it is infinitely better to be able to bestow charity than to be compelled to accept it.

"Don't let any professor convince you," I tell them, "that 'the world owes you a living.' Get it firmly into your head that it is up to you to fit yourself to earn a living and that you will encounter plenty of competition. Don't hesitate to sacrifice in the fore part of your life if you hope to fare well in the later part of your life. Rainy days will come. Make diligent provision for them."

I tell them that, going forth in this spirit, eager to put more into the world than they hope to take out of it, and possessing unshakable faith in the eternal laws of justice and righteousness, they will find life joyous, they will accept difficulties as a challenge to their manhood, that, doing the right, they will never be tempted to give way to despair, but will find their own life increasing in happiness and service with the passing years.

Above all, that they must not be drones, loafers, leaners; that they must exert themselves to the utmost to be useful; that through self-discipline and self-denial they may reasonably hope to earn the means to practice generosity and unselfishness.

Now, however, there is dangled before them the prospect of an earthly Utopia, ruled by a Santa Claus Government, pictured as prepared to shoulder responsibilities which I was taught could be and must be discharged only by each individual for himself, responsibilities which were portrayed not only as inescapable, but as essential to the development of sturdy manhood, development of the soul, development of sterling character.

I am somewhat troubled lest my own young men and other young men may imbibe the notion that hereafter there is to be less need for supreme effort, less need for self-denial and self-discipline, less need for sacrificing to save, less necessity for self-reliance, less occasion to worry over finding work to do in the world or to sweat to perform it unstintingly, less reason for systematically striving to provide for old age.

Perhaps this man is unduly concerned about the effect which all the loose talk of to-day about taking no thought of the future—that the Government will look after everybody at all times and under all possible sets of circumstances—is having on the youth of the country. Possibly his anxieties and questionings will prove wholly unwarranted. Let it be hoped so for his sake, and the sake of his four boys and of all other young men who may be tempted to disregard the teachings, the lessons and experiences of past generations and, throwing self-reliance and self-effort to the winds, become leaners on the state.

Nevertheless, all thoughtful and conscientious fathers and mothers must be perturbed as they witness the outpourings of dreamers and faddists preaching false doctrines and seeking to wean the young people of to-day away from acceptance of and belief in those cardinal qualities which constituted the characters of men and women who have left their impress on the life and progress of the world, and lived useful lives. The worst enemies of youth are those self-appointed advocates and saviours who present to them as ideal a life of absolute contentment and leisure, free of personal responsibilities, free of worry, free of difficulties, with Governments playing the role of Santa Claus every week and month of the year.

THE FLAVOR LASTS

Improve Montreal Harbor

May Move Passenger Section Five Miles Eastward

Plans for the complete rebuilding of Montreal harbor were outlined at a meeting of the Montreal harbor commissioners. The plans would allow quicker access from the St. Lawrence river, higher water, easier dredging in the softer bottom and elimination of the "St. Mary's current."

It was learned the harbor plans will in time move the whole passenger harbor about five miles eastward. The drawings show eight new piers, four of which will be long piers likely accommodating two ships, while in between them are four shorter piers. It is expected the new piers will accommodate about 40 vessels.

Decision to move the harbor further east, it was learned, came after a statement by Chief Harbor Engineer Paul Lecalire that dredging is a much easier task in the softer bottom further down the river.

Moving of the passenger section eastward, with softer bottom allowing easier dredging which would deepen the water, is expected to bring larger ocean-going ships to Montreal. In time it is hoped to have the channel deepened to 40 feet.

The St. Mary's Current, which makes shipping at times hazardous, is practically negligible further down the river, it was stated.

The new harbor development would cut down the time in the run from Quebec to Montreal by about an hour.

SHE PLAYS ORGAN AT 75 YEARS

Takes Kruschen To Keep Rheumatism Away

Writing to tell how she keeps her activity, this wonderful old woman states:—

"My hands were becoming so crippled that I had to give up piano and organ playing—and almost entirely gave up knitting. I have been using Kruschen Salts for nearly two years, and am very pleased with the result. Last August I played two church services on the organ, and hope to do so again this August. My fingers are nearly straight, and quite supple, and I am 75. I have recommended Kruschen Salts to many people."—A.A.C.

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, which is the recognized cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

Currency Stabilization

Want Anglo-U.S. Conference To Settle The Question

Stabilization of world currencies was introduced into the budget debate in the British House of Commons by Sir Herbert Samuel, leader of the Liberal opposition, and other speakers.

"I wish the chancellor in his report had expressed a desire to secure a measure of stabilization of currency and could have told us some form of a conference is contemplated with the United States upon which, fully as much as upon ourselves and France, the decision rests," said Sir Herbert.

"Japan depreciates the yen, America the dollar, Belgium the belga, Britain the pound," Sir Herbert continued. "Depreciation is one of the prime reasons for the low level at which the state of the world continues."

"I regret the chancellor has made no survey of this important factor."

Furney Braithwaite, Conservative, echoed Sir Herbert's sentiments.

The milkman is becoming quite diversified in his line of products. Not only does he deliver orange juice, eggs, cheese and milk to New York residents, but in Providence he has added oysters to his morning deliveries.

The first book of American cooking recipes has been attributed to Eliza Leslie, Bostonian, the date being 1830.

Strange Substance

Produce Hormone That Has Effect Of Taming Wild Animals

Isaiah's prophecy that the lion and the lamb shall lie down together and a little child lead them was shown to be a scientific possibility at the American Philosophical Society meeting in Philadelphia.

The chemical substance to tame both animals is available if anyone wants to try it out.

The society was shown motion pictures of a fierce, flesh-eating, grown rat lying down with a new-born squab and trying to mother it. The pictures were shown by Dr. Oscar Riddle, of the Carnegie Institution of Washington.

The rat had received an injection of prolactin, a hormone produced by the pituitary glands of human and all mammals, including lions. The rat was an unmated female, with nothing but wild instincts, and no previous experience with mothering anything.

The prolactin induced immediately a maternal instinct so powerful as to mask the rat's natural appetite for eating young squabs.

Prolactin was discovered three years ago by Dr. Riddle. Previous experiments with it indicate that it acts on all animals in similar fashion.

Its primary function is to cause female mammals to give milk for their young. It has done that even when given to males.

Gets Coveted Medal

The U.S. war department has presented the coveted "Purple Heart" medal of honor to Johnny John, full blood Cree Indian and world war veteran of Wetumka, Oklahoma. He was cited for bravery and severe wounds sustained in the Meuse-Argonne battle of 1918.

Milk baths are offered guests at hotels on the island of Oshima, near Japan, because milk is plentiful and water is scarce.

Little Journeys In Science

SOAP

(By Gordon H. Guest, M.A.)

When fat or oil and alkali are heated together under proper conditions soap and glycerin are produced. Soap is made commercially on a very large scale. The oil or melted fat is poured into huge kettles together with a solution of lye. As a rule the kettles are very large, 500,000 pounds or more of soap being made in some of them in a single heating. They are provided with coils of steam-pipe for heating the liquid. The fat and alkali are stirred by forcing live steam into the bottom of the mixture. The chemical reaction which takes place in soap-making is completed in about one day. The soap is then suspended as very fine particles in the liquids present, or the chemist would say that the soap is in the form of a colloidal dispersion. To obtain the soap in the solid form common salt is added and this process is known as "salting out". After the salt is added and the mixture heated, the soap rises to the top of the liquid and the soap thus obtained is purified by washing and settling processes and is then run into the mixing machine called the crutcher. Here it is mixed with substances such as perfume, borax, waterglass, or washing soda. It is then run into large molds called frames to harden, after which it is cut and pressed into cakes of the desired size.

Transparent soaps are usually made by dissolving dry soap in alcohol and adding from 15 to 25% of sugar. Castile soaps are made of olive oil. The colour of mottled soaps is produced by the addition of Prussian blue or some similar pigment. Floating soaps owe their lightness to bubbles of air and naphtha soaps contain about 5% of petroleum naphtha. Scouring soaps contain from 5 to 10% of soap and from 80 to 90% of some material such as fine sand or volcanic ash. Soap powders usually consist of a mixture of washing soda and ground soap to the extent of 10 to 25%.

The Big Bend area of Texas is a triangle of about 5,000 square miles enclosed by the big bend of the Rio Grande river.

Amending British North America Act May Result In An Entirely New Constitution For Canada

The matter of amending the British North America Act is one for discussion between the Dominion and the provinces, according to various provincial attorneys-general, telegrams from whom were read to the parliamentary committee considering the B.N.A. Act.

The provincial administrators believed the Dominion should formulate its plan first and then submit it to the provincial authorities, after which a conference would ensue.

"The question of what, if any, provision is to be made for amendment of the Canadian constitution from time to time," said Hon. T. C. Davis, attorney-general for Saskatchewan, "is one which ultimately must be decided by conferences between the governments of the provinces and the government of Canada with the possibility of a previous preliminary inter-provincial conference. In view of this fact it would appear to be unwise for the provinces to be giving their views before a committee of the House of Commons."

Mr. Davis suggests the committee make its report to the house and that this report be made available to the provinces.

Hon. W. J. Major, for Manitoba, declared he would submit recommendations after prorogation of the provincial legislature.

New Brunswick declared that a brief would be submitted to the committee after adjournment.

Amendment to the B.N.A. Act should take the form of an entirely new constitution for Canada, and it should be drafted by a constituent assembly representative of the whole people, Dr. Arthur Beauchesne, clerk of the House of Commons, told the committee studying the proposals to amend the act. The imperial parliament should, after Canada's new constitution was written, be requested to repeal the act.

Enlarging upon the suggestion, Dr. Beauchesne declared the personnel of this constituent assembly should be representative of the senate, the house of commons and the provincial legislatures and should be one-fourth of the present number of each.

That was to say, the senate, with 96 members normally, would have 24 representatives in the constituent assembly. The House of Commons would, with its 245 members, have 61. The provinces would be proportionately represented as follows:

Alberta, 16; British Columbia, 12; Manitoba, 14; New Brunswick, 12; Nova Scotia, 8; Ontario, 23; Prince Edward Island, 8; Quebec, 23, and Saskatchewan, 16. The total representation would be 223.

This constituent assembly would meet at Winnipeg, summoned by proclamation issued by all the legislative bodies involved. It would be clearly set forth that "minority rights," preserved under the present British North America Act, would not be discussed. The representation would be drawn from all classes.

"There ought to be no government side nor any official opposition in such a body," said Dr. Beauchesne. The assembly would work on the lines of coalition. A committee of premiers and leaders of the opposition in the House of Commons and legislatures would have charge of the agenda and daily order of business.

At the first meeting each province would present its case, and committees would deal with every chapter of the British North America Act. Such matters as reducing membership in the House of Commons, election of senators, fisheries, Companies act, insurance laws, radio and other questions would be thoroughly threshed out.

One item to be decided would be whether Canada would alter its name from a Dominion to a kingdom.

Once a constitution had been adopted by the assembly, Dr. Beauchesne continued, it should be approved by each province and by the Dominion, then it should receive the assent of the king. Such a procedure would apply to subsequent amendments which would require a ma-

majority of two-thirds of the respective legislatures.

Dr. Beauchesne was opposed to continuing provincial subsidies. There should be a readjustment of taxation and expensive services should be transferred to the Dominion. Each province should pay the salary of its own lieutenant-governor, who would, however, continue to be appointed by the Dominion. Similarly the provinces would be required to pay the judges of their own superior courts.

Dr. Beauchesne urged establishment of a Canadian judicial committee of the privy council.

Choosing Fertilizers

Provincial Governments Assisting In Work For Benefit Of Farmers

This is the time of year when farmers are purchasing or considering the purchasing of fertilizers for the various farm crops.

Until quite recently, farmers who had not made a study of fertilizers usually depended upon the local fertilizer agent to advise them as to the particular analysis they should use, and unfortunately the advice from this source was not always in the farmer's best interest. A more acceptable source of information is now at the service of farmers, for the Provincial Governments in Eastern Canada have in recent years set up fertilizer councils composed of leading authorities in agricultural chemistry, farmers who have a practical knowledge of the use of fertilizers, and representatives of fertilizer manufacturers. These councils publish recommendations as to the analyses most suitable for the various crops under the various soil conditions, and thus are performing a valuable service to farmers in assisting them to select fertilizers which promise the most economic returns.

The fertilizer division of the Seed Branch, Dominion Department of Agriculture, commends the work of the Provincial Fertilizer Councils for the guidance afforded by them to farmers in solving fertilizer problems.

Reduction In Insurance Rates

25 Per Cent. Reduction For Freight Traffic Over Bay Route And Season Extended

A 25 per cent. reduction in the cargo insurance rates on freight traffic over the Hudson Bay route has been granted by Lloyds.

Coupled with this is an extension of a month and five days in the open season for which insurance may be obtained.

Last year's rates will apply for the extension period.

Announcement of the new rate was made at Regina by Hon. W. J. Patterson, minister of natural resources and minister in charge of the insurance act.

Announcement of a 25 per cent. reduction in hull insurance has already been given out from Ottawa.

Word of the new cargo rate came by way of a cable to R. H. Cook, Regina agent of Lloyds of London.

The new rates, effective between August 10 and October 10, will be three quarters of one per cent. as compared with one per cent. formerly. For the extra month at the beginning of the season the old one per cent. rate will apply. For the five day extension at the end of the season the rate will be 1 1/2 per cent.

Change in the open navigation season was sighted by bay enthusiasts as definitely opening the way for traffic in binder twine for use in harvest fields of western Canada.

Switzerland has a large railway bridge which can be stored during the winter to protect it from avalanches.

Peiping, China, "the world's dustiest city," suffers from dust storms that blow in from the Gobi desert.

Iceland's capital, Reykjavik, has a thoroughly modern hospital of 100 beds.

Livestock Show

Western Livestock Men Plan To Hold Western Royal Show Annually

A "Western Royal" livestock show, along similar lines to the Highland show in Scotland and the Royal Agricultural Show in England is in process of formation by prominent livestock men in the west.

The plan is to hold a combined livestock show annually, the show being rotated in turn between the provinces of Manitoba, Saskatchewan, Alberta and British Columbia. In this way stockmen hope to create a keen interest in livestock in each of the western provinces by making a great exhibit of livestock easily accessible to the western Canadian public.

Promoters hope for the same co-operation and support for their western venture from eastern livestock interests as has been extended by western stockmen to the Toronto Royal show in past years.

Inter-provincial competitions will be featured for each of the breeds and the show is being organized in provincial units, the directorates being composed of the presidents of each of the provincial breed associations and breed clubs.

The responsibility of getting out their most attractive and representative exhibits is being placed directly on each provincial association and club. This, it is felt, should develop a friendly rivalry in inter-provincial competitions and result in a combined exhibit of the very best in livestock that western Canada has to offer the public.

Stockmen interested in the project declare the depression is over for livestock and it is again taking its proper place in western agriculture.

Historic Spot

In a quiet garden of a residence in Martitzburg, Natal, a company of distinguished people honored a flat-crowned mimosa tree, under the spreading branches of which General A. W. I. Pretorius, members of the Volksraad, and burghers of the Natal Republic decided on July 5, 1842, to accept British rule. The 1935 group unveiled a plaque at the base of the tree telling of its place in history.

Interplanetary Communication And Other Wonders Forecast By American Chemical Society

Maple Syrup Throughout The Year

Production High And Price Expected To Be Lower

Production of maple syrup and maple sugar this year in Eastern Canada promises to be higher than for several years past, according to the Fruit Branch, Dominion Department of Agriculture, and consequently the price is low. The season opened early in March in southwestern Ontario and is now about to close in Eastern Quebec and the Maritime Provinces.

Notwithstanding the general high quality of maple syrup and maple sugar produced in Canada, the Department points out that the per capita consumption of maple products in the Dominion is only 2.7 pounds annually. Most of this is consumed in the spring time, for the reason that it is not generally known that maple products can be kept throughout the year. Any fear that the syrup will ferment in cans that have been opened may be obviated by removing the syrup from the cans when purchased in the spring, heating the syrup, putting it in glass sealers, and storing in a cool dry place.

Export of Canadian maple products to the United States, which, for some time, was the principal market, is now restricted, due largely to a tariff of six cents per pound on maple sugar and four cents per pound on all maple syrup. This year's supply of maple products will be sufficient to meet all domestic demand.

Queen Marie Takes Credit

Marie, Dowager Queen of Rumania, in her autobiography takes unto herself much of the credit for bringing Rumania into the Allied ranks during the Great War and keeping it there even after the little nation was exhausted. Marie describes her activities in "Ordeal: The Story of My Life."

The SNAPSHOT GUILD

SPRINGTIME IN THE ZOO

Get environment in your zoo pictures. It adds much to their interest.

"What is it we always look forward to seeing in the spring?" a teacher asked her class of eight-year-olds. "The animals in the zoo," piped up Mickey.

Mickey might have added "and snapshots," for there are in this world a few people who park their cameras on the closet shelf at the first sign of winter and, like the bear in the zoo, it hibernates until the arrival of spring.

If you own one of these hibernating cameras you had better get it out, dust it off, carefully clean the lens, load it up with film and be on hand at your nearest zoo when the keeper lets his animal family out of the indoor winter quarters to the outdoor cages. There's a real chance for some great pictures and a great chance for some real pictures.

There's one great advantage in taking animal pictures at the zoo in early spring. The foliage on the trees is not as heavy as it becomes later in the summer so your light is much better.

Background and foreground should be given careful consideration in taking pictures of animals and fowl at a zoo. In other words, try to get environment in your pictures—natural settings. Don't just walk up to

the cage or corral and shoot. If the lion's den, for instance, is at the back end of his cage, which it usually is, don't snap your picture from the side and have an adjoining pen of ostriches for your background, for in natural surroundings the lion and ostrich do not mix socially. Get as close to the bars of his cage as you can and shoot.

"But," you may say, "if I snap him when he is right up against the bars I would get a larger image." That's true enough and at the same time you would be getting just another picture of a lion. Suppose the image of the lion is smaller at a greater distance from your camera. How about an enlargement of the lion and enough of the entrance to his den to add environment.

Many amateurs overlook the possibilities in trimming and enlargement and in doing so they pass up the opportunity to change what would be an ordinary snapshot into an outstanding photograph.

Keep these things in mind when taking all kinds of animal pictures—wild and domestic. Get environment in the picture and you will soon be convinced by results that it is well worth the little thought and effort it requires.

JOHN VAN GUILD.

Complete defence for women and children in war, no more growing old but living a whole life at 22 or 35, and giving Mars some water and Venus some oxygen in her atmosphere were forecast by Thomas Midgley, vice-president of the Ethyl Gasoline Corporation.

These forecasts for the next 100 years were released by the American Chemical Society, celebrating the tercentenary of chemistry in America.

Dr. Midgley said the forecasts probably do not overstep the boundaries of accepted natural laws. Some of them are certain, others may be delayed, and it is not possible to predict which. But it is certain, he thought, that there will be an end of cold, flu, tuberculosis, possibly cancer and many other ills.

In the synthetic home in the next century, he said, you will throw off the bed clothes by snapping your fingers, warm the room instantly by pushing a button, then throw your pyjamas into the waste basket, for then cellulose goods will be so inexpensive it will be cheaper to throw them away than to launder them.

"Indigestion will be unknown," he said, "for with discovery of certain hormones in the stomach of the boa constrictor, it will no longer be necessary to stay up after eating to digest one's dinner—just a boa pill and right to bed."

"Sleep will be undisturbed and bad dreams banished. There will be 'dream tablets,' chemicals inducing only pleasant dreams, or other tablets stopping all dreams."

"Engineering," he said, "is already waiting for chemistry to give a fuel which will be capable of releasing more energy per pound than is required to lift that pound out of the earth's gravitational field. Given such a fuel, interplanetary travel will be possible."

"I do not want to give the impression that interplanetary transportation will become a commonplace immediately. Considerable preparation of environment will be necessary. Mars will need water, Venus a new atmosphere, all of which will mean work for future chemists and engineers."

Chemistry and physics will develop defensive weapons in war to offset any sort of destructive progress.

"The control of the age cycle," he went on, "will become a fact, making it possible for an individual to order long life, except for accident."

Agriculture will be speeded by controlling the amount of ozone in the atmosphere and other ways particularly with synthetic hormones to promote growth.

"In this way there will be a much greater and more rapid meat production," Dr. Midgley explained. "A century hence chickens will be the size of pigs, pigs the size of cattle, and cows and bulls as big as mastodons, yet the food consumed to accomplish this will be no greater than used at present."

Irish Discovered America

Dr. Stefansson Has New Theory Concerning History Of New World

Dr. Vilhjalmur Stefansson, Arctic explorer, says the Irish discovered America six or seven centuries before the voyage of Christopher Columbus in 1492.

The explorer told the Pennsylvania Historical Association the pope has documents to support his claim. "We'll probably never know the name of the man who discovered America," he added, "but we may be positive he was an Irishman."

Stefansson described a paper written by an Irish monk in 820 A.D. telling of colonization of Iceland by the Irish at that time and said Vatican records show the pope in 1126 made Greenland a separate bishopric which had an unbroken line of bishops until 1528.

London received its first successful cargo of meat from Australia in 1880,

J. E. Gooder - Editor & Manager

Crows are Menace To Our Bird Life.

Dear Sir:

It is our considered opinion that if many of the more desirable species of bird life are to be saved for the pleasure and profit of ourselves and posterity, that a more energetic and well organized effort at conservation must be made than has yet been instituted.

Many factors influence the propagation of this bird life, such as drought, and over-shooting of game birds; but a vast amount of evidence has accumulated indicating one of the most detrimental factors to be the depredations of the crow, and it is a factor concerning which something can be done.

That our citizens derive great enjoyment from our wild song birds and game birds is recognized by all, but as a valuable natural resource they are not so generally understood. Many people do not realize that they are a necessary aid to successful agriculture. Regarding the dollars spent by sportsmen in the pursuit of game, Mr. W. G. Ross, President of the Regina Fish and Game Club, states in a recent article in "Kennel and Bench":

"Canada at least spends sixty millions but only a small percentage of the people know about it or are aware that this is a real industry at their own doorsteps, which needs help by conservation and assistance in development."

This is a goodly sum distributed amongst our many citizens who supply the varied wants of this army of sportsmen.

The following are some comments made by outstanding naturalists and nature lovers regarding the destructive proclivities of Mr. Crow:

"The Canadian friend with whom I was shooting is a sportsman-naturalist. . . . He estimates that under the best conditions crows destroy 40% of the first duck eggs laid. . . . A. E. Henge, K.C., of Saskatoon reports that out of 24 duck nests observed in one locality, crows got the eggs out of 17. . . . The crow is a bad actor. In the interest of game birds he must be controlled. Farmers are universal in condemning him as a destroyer of crops. Bird men and sportsmen know him as an eater of eggs and fledglings; and yet, because a few long-haired anti-everything fellows contend that he does a certain amount of good when he occasionally eats a hairy caterpillar, certain individuals in authority hesitate to paint him in his true color, which is jet black."—Ray P. Holland, Editor of Field and Stream.

Our own Jack Miner, of Kingsville, Ont., writing in the "Atlantic Sportsman," makes the following statements regarding the Crow:

"... but to my surprise they were not feeding their young on corn. As I held these old birds up by the tail as they gasped their last, they spewed up birds' eggs. I have seen as high as seven unhatched robins pour out of the mouth or throat of a dying crow, and the little bits of life were sometimes still squirming. Dear reader the above is only a flash of the cruel, wicked, murderous ways of these black, old nest-robbers. . . . I don't believe there were ten per cent as many then as there are today. To the sportsmen and bird lovers of the continent let me hand this boiled-down sentence: 'Don't expect our desirable birds of Canada to increase until the crows are decreased.'"

In the light of such evidence, and of the observations which you, yourselves, must have made in this connection, we ask your co-operation in making the public acquainted with the facts of this urgent problem, and that you will use every means within your power to lessen the vandalism of the thuggish crow. Crow-shoots, traps, and encourage-

National Barley Committee.

Barley is graded according to quality into two classes, Malting Barley and Feed Barley. Malting grades are No. 1 C.W., No. 2 C.W., No. 3 Extra C.W. (6-row and 2-row respectively). The Feed grades are No. 3 C.W., No. 4 C.W., No. 5 C.W. and No. 6 C.W. barley.

According to the Canada Grain Act, Six-Row Malting Barley must be of a variety or type equal in malting quality to O.A.C. No. 21. On recommendation of the National Research Council the Board of Grain Commissioners has ruled that only the following varieties shall grade into the Six-Row malting grades: O.A.C. No. 21, Mensury, Manchurian, Mensury Ottawa No. 60, Chinese, Gartons and Peatland.

Two-Row malting barley according to the "Act" must be of a variety or type equal in value for malting or pearling purposes to Canadian Thorpe. By the same ruling of the Board only the following varieties shall be placed in these grades: Canadian Thorpe, Duckbill, Hannchen, Gold, Charlottetown No. 80, Plumage Archer, Early Chevalier.

All other varieties, including the smooth-awned sorts such as Regal, Wisconsin No. 38, etc. shall be graded into No. 3 C.W. or lower, depending on quality.

Too Much Wealth in the hands of Too Few People!

In the countryside, in streets of villages, towns and cities; in homes, in market places; from pulpits and public platforms; from men in many walks of life, you hear the same pronouncement—"Too much wealth in the hands of too few people."

WHO can rectify such an unsatisfactory state of affairs? —In many cases the PEOPLE themselves have the remedy.

In the grain business the GRAIN GROWERS have the remedy in their Co-operative Marketing organization. All they need to do is to give their patronage.

Co-operative Organization is the most effective means of preventing accumulation of great fortunes in the hands of a few people.

Alberta News Items.

350 Degrees Received.

A total of 350 degrees, diplomas,
etc. were awarded at the annual
convocation of the Alberta Universi-
ty on May 16. The President's ad-
dress indicated that the total enrol-
ment at the University for the past
year had been 1,900 in all courses.

Five Conventions for Alberta

Five conventions of a more or less
national character will be held in
Alberta this year. The Canadian
Seed Growers' Association and the
Canadian Society of Technical Agri-
culturists, which includes within its
ranks some prominent agriculturists
throughout the Dominion, will meet
in Edmonton during the week of
June 19 and June 24. Sir Francis
Floud, British Minister to Canada,
will speak at the latter convention.
Western Canada Dental Association
will meet in Calgary the latter part
of June, and the Canadian Federa-
tion of Business and Professional
Women's Clubs will meet in Calgary
the first week in July. In the fall
the Dominion Amputation Associa-
tion will meet in Edmonton.

Alberta Leads in Hog Marketings.

For the first time in its history
Alberta took the lead among the
provinces this spring in the matter
of total hog marketings. For the first
18 weeks of the year marketings for
Alberta totalled 342,995 head, com-
pared with Ontario's 298,954 head.
Further marked improvement was
shown in the quality of the Alberta
hogs, the total percentage of select
and bacon marketed during the
above period having been 55.95,
passing the 50 percent mark for the
first time, as compared with 46.16
percent for the same period in 1934
and 40.50 percent for 1933.

Will Grow High Quality Seed

Contracts for between 600 and
700 acres of seed beans and peas
may be signed in the Lethbridge
Northern Irrigation area for pro-
duction this season, following
negotiations of a Vancouver firm.
This is the area in which interna-
tional championships have been
won during the past few years in
field peas and beans, and consid-
erable demand has grown for this
seed.

New Official Arrives

Dr. K. W. Neathy, who is to re-
place Dr. O. S. Aamodt as head of
the field husbandry branch of the
University of Alberta, has arrived
in the province from his former
home at Winnipeg, to assume his
duties.

Unique Coal Shipment

Unique among coal shipments
going from Alberta was one of two
carloads prepared at Foothills for
transport via rail and air to trading
posts in the Arctic at a price of \$100
a ton, many times the original
price. The 70 tons is of egg-size
stove coal, hand picked and filled
into sacks weighing exactly 100
pounds each.

Extension of District Agent Service

Re-organization and enlargement
of the system of district agricultur-
ists in the province has now been
completed by Hon. F. S. Grisdale,
minister of agriculture, who an-
nounced Wednesday the creation of
the additional districts and appoint-
ment of officials. This has been
brought about largely by a re-or-
ganization and decrease of the num-
ber of officials in the department
offices, and by utilization of officials
of the schools of agriculture for the
seven-month recess in spring and
summer in which the schools do
not operate.

While S. G. Carlyle, provincial
livestock commissioner will act as
supervisor of the field representa-
tives, the entire system will be di-
rected by a board of which H. A.
Craig will be chairman, and which
will include both Mr. Carlyle and
O. S. Longman, field crops commis-
sioner, and Prof. J. P. Sackville, of
the animal husbandry department,
and Dr. K. W. Neathy, of the field
husbandry department of the Uni-
versity.

Tennis Notes.

A meeting of representatives from
Carstairs, Didsbury, Olds and Cross-
field has been held to arrange a
schedule of games for the district cup
which is at present held by Cross-
field.

It was decided that instead of the
counting of match points as formerly
that score of the events won will be
kept, and the aggregate of the events
won in all three events would deter-
mine the holder of the Cup.

It was decided to just have a sched-
ule of games to be run off before the
end of June, each town to play the
other towns once.

Following is the schedule drawn
up by the appointed committee:

JUNE 5: Olds at DIDSBURY
JUNE 12: Crossfield at DIDSBURY
JUNE 12: Olds at Carstairs
JUNE 19: Crossfield at Olds
JUNE 23: Carstairs at Crossfield

Golf Tournament at Innisfail, June 2 & 3

At a recent meeting of the execu-
tive of the Innisfail Golf Club it was
decided to hold the annual golf
tournament on June 2nd and 3rd.

The tournament committee are
Messrs. H. H. Smith, Alex Milne
and E. W. Willis, with Mr. Rex
Tetley as secretary-treasurer.

A program of events, including
qualifying round, championship
flight and other flights, long drive,
approaching and putting, should
provide two days' good golf.

The course is in splendid condition
and everything possible will be done
by the committee to provide a good
time for their guests.

Invitations are being sent out to
all the golf clubs of the province and
indications are for the biggest and
best tournament in the history of
the club.

WEEKLY SERMONETTE

"In the book of Genesis and again
in the Psalms we read that God has
made us in His own image just a
little lower than the Godhead. This
should give us pause as to the way
we live. We can do no little thing,
have no small dealings, commit no
unholy act or no unkind deed, when
we have this conception of the
sacredness of our personalities—
made in the image of God. This
is a thought to lift our souls to the
stars."

BABY'S OWN SOAP

"It's Best for You and Baby Too"

WORLD HAPPENINGS BRIEFLY TOLD

Birmingham, which now claims to be England's most prosperous industrial city, is assisting Liverpool by finding work for unemployed juveniles.

Aliens will not be qualified to vote in school districts which have been established for 10 years or longer, under the terms of an amendment to the School Act which was passed by the Alberta legislature in committee of the whole.

A small balloon of a type sent up for meteorological observations has been found by two Indian trappers in the bush 80 miles west of Sudbury. There were no identifying marks on the balloon to indicate from where it came or its purpose.

As a token of goodwill and loyalty in connection with the king's silver jubilee, Windsor, Ont., has sent to Windsor, England, a souvenir plaque made by the Windsor-Walkerville vocation school from a piece of oak taken from the city hall.

Three Germans were arrested in Algiers on orders from Marseilles as they prepared to depart for Southern Algeria, giving rise to the belief that France had uncovered a new spy plot, this time in one of her colonial possessions.

Signal honor was paid Speaker George N. Johnston just before the provincial legislature prorogued at Edmonton, when the house decided that "the chair occupied with such dignity for so many years become the personal property of the speaker."

A committee will be appointed shortly by the Ontario government to inquire into the whole financial structure of education, Hon. Paul Leduc, Ontario minister of mines, told the separate school trustees section of the Ontario Education Association.

William "Bill" Brooks, the Halifax war veteran who walked on foot to the Canadian corps reunion in Toronto last year and then walked back to Nova Scotia, is in Montreal on a hike to Vancouver. A chance of work in Vancouver prompted "Bill" to take to the road again.

The Last Post

Will Be Sounded Daily From The Menin Gate At Ypres

The "Last Post" will be sounded daily at the Menin Gate of Ypres for ever. At this spot, familiar to many Canadians who fought in the Great War, and scene of bitter fighting, Belgian firemen for four years sounded the lament daily on bugles presented by the British Legion.

The Legion now has raised an endowment fund to ensure that the ceremony will be performed in perpetuity.

Boy Scout Resourcefulness

Old toys, old clothes, old shoes, old furniture are frequently called for by Boy Scouts in their welfare work. It remained for Oxford Scouts to spring a new one. They were asked to be Roman soldiers in a pageant. Having the Scout reputation for resourcefulness, they were requested to provide their own Roman helmets. The answer: 100 old bowler hats, minus rims, plus 1 gallon aluminium.

To study bird migration across the desert, and other matters, a scientific expedition has left Cairo, Egypt, for the Gif Kebir plateau in the Libyan Desert.

Mosquitoes Always Were

Specimen Preserved In Amber From 600 B.C. Period

In the year 600 B.C. mosquitoes apparently were just as annoying as the modern species, if size is any indication. A mosquito whose proportions are larger than those of its average present-day descendant is preserved in pure amber owned by H. C. Page, Saint John.

Geologists estimate the insect was entombed more than 2,500 years ago. The neatly cut piece of amber, crystal-clear, preserved the mosquito perfectly, including even the fibrous hairs on its body and legs.

Amber, a solidified refinement of tree balsam, is found mostly in the bituminous fossils of timber along the shores of the Baltic and other parts of maritime Europe, Page said. The jewel in his possession came from the northern coast of Russia, where vast areas were under water for centuries.

Gas Raid Defence

Great Britain Mobilizing Civilians In Preparation For Attacks

Great Britain is quietly mobilizing her civilian forces for defence against gas and bombing attacks, it was disclosed when Colonel E. M. Cowell, director of the British Red Cross in Surrey, appealed for 1,000 men and women for volunteer first aid nursing work at Croydon airport.

More than 500 have already been recruited and trained under auspices of the Red Cross, its officials said.

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT (Grapho-Analyst)
(All Rights Reserved)

Here are some replies to letters received from readers. Others will find them interesting, too, as showing just what Graphology can do for you.

Miss B.L.: You are inclined to be somewhat highly-strung, and are apt to get easily excited when things do not go just as you would like. This is not a weakness in the ordinary sense of the word; it is more a temperamental disadvantage, brought about because you are so swayed by your feelings. You are so quick to feel joys and sorrows, and will probably suffer a good deal as a result.

Yours is not a nature that would find nursing a very suitable occupation, and it is fortunate that you recognized this and discontinued your training. The ideal nurse needs to be well-controlled, able to "keep her head" in emergencies, and at the same time to be sympathetic and kindly. You do have the latter traits, but certainly would not show at your best during tense moments.

You are independent, in the sense that you are chary of accepting the help of others. And you have a good regard for order and neatness and are careful about details. All in all, you should do fairly well at your office work, and be far happier than in the occupation of nursing.

Mr. A.G.T.: You have a fairly normal nature, with a slight leaning toward ardour, but are by no means intensely emotional. Your sense of judgment is well to the fore, and will, as a rule, prevent you from doing anything too impetuously.

You are, perhaps, too prone to view the future a little cynically, without that faith and ambition that a young man like you should have. Be more definitely ambitious; make your plans for the future, and then get down to brass tacks to try and realize them.

Miss P.A.D.: It seems to me that most of your trouble can be traced to the changeable nature that you have. You flit too readily from one thing to another, and don't succeed in any of them because you don't devote sufficient energy and concentration. You vary in your moods and the result is that no sooner have you become interested in one particular thing than something else turns up to distract your attention and interest temporarily. I am writing you direct, because it is essential that you adopt a more definite course to follow in order to make any real and lasting progress in the future.

Do you want to know what your handwriting tells about your character? And to find the real truth about your friends? Send specimens of the handwriting you want analysed, stating birthdate in each case. Send 10c coin for each specimen, and enclose with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. All letters will be treated confidentially, and replies will be mailed as quickly as possible. Please allow about two weeks for your reply, due to the volume of mail that is coming in.

Seagram Gold Cup

Golf Tournament

Professional Teams From United States And Japan Will Compete

Word has been received from George R. Jacobus, President of the United States Professional Golfers' Association, that he will select the captains from the foreign-born and native-born teams of United States professionals which will compete in the \$1,000 General Brock Hotel Open Golf Tournament, which is to be played at the Look-out Point Country Club at Fonthill, Ont., on July 11, 12, and 13. The United States amateur teams will choose their own captains from among their numbers.

Tome Miyamoto
Captain
Japanese Golf Team

Similar arrangements will also be in vogue with the Canadian teams.

The first professional team entry for the Seagram Gold Cup, emblematic of this six-man team championship, has been received from the Japanese Golf Association and includes: Tomekichi Miyamoto of the Ibaragi Golf Club, Kyoto, present Japanese professional champion; Seisui Chin of the Musashino Country Club, and Ryokuzo Asami of the Hodagaya Country Club, Yokohama, both former champions; Toichiro Teda of the Hirono Golf Club, Kobe; Kokichi Yasuda of the Tokio Golf Club; Kenkichi Nakamura of the Fijisawa Country Club, and Yutaka Kanuma, secretary of the J.G.A., who is accompanying the team as manager. It is confidently expected that at least ten teams will be entered in this competition.

Washington State Claim

Matter Of Damages From Sulphur Fumes At Trail, B.C., Nears Settlement

The state department at Washington has announced that a convention for the final settlement of the controversy arising from damage done in the state of Washington by sulphur fumes from a smelter at Trail, B.C., was signed at Ottawa.

The convention, signed by Prime Minister R. B. Bennett, for Canada, and by Pierre L. Boal, charge d'affaires, for the United States, provides for the appointment of a joint arbitration tribunal which will pass on all damage alleged to have been done to Washington forests, crops and livestock, since Jan. 1, 1932.

The tribunal will consist of jurists named by the United States and Canada with a chairman to be appointed by both governments from some neutral country.

The convention must be approved by the United States senate and the Canadian parliament.

State department officials said it would be transmitted to the senate immediately for the earliest possible action.

The convention also provides that the Canadian government will cause to be paid \$350,000 for damages up to Jan. 1, 1932, as recommended by the report made by the international joint commission in February, 1931. The tribunal also is expected to make recommendations for the installation of fume elimination apparatus or other measures to prevent future damage.

New Empire Feature

Monthly Broadcast From St. Paul's Cathedral Starts In June

The Empire will soon be able to listen to services in St. Paul's Cathedral.

Arrangements are being concluded between the dean and chapter of St. Paul's and the British Broadcasting Corporation for a service to be broadcast to the Empire each month.

The services will be held on the second Sunday of each month, beginning on June 9, and will occupy 40 minutes—from 2:15 p.m. to 2:55 p.m. (British summer time).

The services will be incorporated in the program of the B.B.C.'s Empire broadcast service, radiated from Daventry, and arrangements will be made for them to be available for reception by the maximum number of listeners overseas, either during the actual broadcast from the cathedral or by means of electrical recordings radiated in subsequent transmissions.

The full choir of St. Paul's will take part.

Aid For Passengers

Time Table Is Produced By Pressing A Button

An invention recently installed in the Victoria Station in London allows the railway passenger to press a button and produce at the instrument's illuminated window a time table for the station desired. Each station is numbered; pressing the correspondingly numbered key brings a printed card into view bearing the complete schedule of trains between Victoria and the station in question.

Similar machines are to be installed at all the principal stations on the Southern Railway, the London Times reports.—New York Sun.

Flowers By The Ton

Shipments Arrive Daily In London For Covent Garden

Imagine measuring flowers by the ton! Dozens or even hundreds don't count at all at Paddington Station in London where about 60 tons of flowers arrive nearly every morning en route for Covent Garden. Already this year 1,500 tons of cut flowers have been shipped into London, and during recent weeks it has been necessary to run 20 "flower specials" from Penzance to Paddington. The flowers are grown in Cornwall and the Scilly Isles.—Toronto Telegram.

A Distinction For Thursday Island

During their present world tour, Lord and Lady Baden-Powell found the greatest number of Scouts and Guides to population in an unexpected place—small Thursday Island, off Queensland. From some 700 inhabitants—400 whites and 300 Malays and Japanese—200 Scouts and Guides greeted the World Chief Scout and Chief Guide.

A Cyclops Bee

A one-eyed bee, and a dead one at that, had its photograph taken by J. F. Reinhart, research fellow in the entomology section of Iowa State College. Only three or four such "cyclops" bees have been recorded, Reinhart said. A normal bee has two compound and three simple eyes, the scientist explained.

Seventy of every 100 men in Birmingham, England, who were idle in 1931 have returned to work.

LINIMENT

GARDENING

Gordon L. Smith

Screening

Growing screens offer a solution to things which are better hidden. The straight lines of a residence should be broken by a few bushes and vines. These growing screens are divided into two classes, annual climbers and tall plants which of course must be renewed each year, and perennial creepers and shrubs or trees. The latter are permanent but take more time to produce and may be supplemented the first year or two with annuals. The annuals, instead, have the advantage of speed, in a month or two they are performing their duty of shutting off an objectionable view, or screening the noon day sun from the verandah, and the very fact that they are there for one year only, allows an opportunity for change, and changing things about is one of the fascinations of gardening. Of the annual plants, African Marigolds, Cosmos, Ornamental Sunflowers, Larkspurs, Castor Beans, and other bushy, fairly tall plants will make satisfactory screens by early July. Among the annual climbers are Morning Glories, Nasturtiums, Sweet Peas, Hops, Scarlet Runner Beans, Cobaea, Gourds, Cardinal Climber and Canary Bird Flower.

Grow Vegetables Quickly

If vegetables are to be tender, they must be grown quickly. Especially with such things as radish, carrots and beets, slow growth is disastrous as the roots become woody and filled with objectionable fibres. But this rule also applies to salad materials like lettuce. Therefore, growth should be pushed along with frequent cultivation, which in addition to checking weeds, also conserves moisture. Cultivation alone will often keep the vegetables going through a dry spell, but of course a few pails of water or an hour or two with the hose at such a time, will prove beneficial. Where the supply of water is not large, plant those things, most in need of extra moisture, such as radish, lettuce and celery, closest to the pump. Fertilizer is another way of hurrying growth and therefore assuring vegetables of the highest quality.

Planting

Flowers divide themselves into main planting groups. The first to be sown are those very hardy kinds which naturally reproduce themselves in Canada. Cosmos, California Poppy, Alyssum, Calendula and Candytuft are very hardy and can be sown first thing in the spring. In the second group are the Zinnia, Marigold, Nasturtium, Stocks, Aster and Petunia, which do not stand serious frost, and of the tender things, which must be held back until all danger of freezing is over are the Dahlias, Cannas, and Gladiolus. As the latter are all bulbs and do not come up until a week or so after planting, they may be risked within a few days of the arrival of really warm weather.

A Family Compact

The majority of farms in western Canada approach very closely to a family business. For instance, during the year 1930, in five main areas in Alberta and Saskatchewan, 82.7 per cent. of all the farm labor used on 573 farms was supplied by the farmer and his family.

Appleford's

Para-Sani

You'll save its modest cost before half the roll is used. That's because this heavy waxed paper keeps left-overs fresh, moist and flavorful. Ask for Appleford's Para-Sani because of the exclusive knife edge cutter on the box.

HEAVY WAXED PAPER

Warehouses At Calgary, Edmonton, Regina and Winnipeg.

TO ALWAYS GET FAST PAIN RELIEF

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Does Not Harm The Heart

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" . . . eases even a bad headache, neuritis or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

CHAPTER XVII.—Continued

"Where'd you bury him?" asked Stone shortly.

"Over there. . . . Our fire was there. . . ." His finger pointed to a dip in the land. The drifting sand had filled the hollow and at first Stone did not recognize the place. "I was a-sleepin' there. . . ." Peyotl pointed. . . . "Next thing I knowed Mist' Sam waked me up and I seen . . . It . . . We buried him over by that clump o' mesquite.

Stone flung him aside and walked over to the pile of loose rocks. How much of this fantastic tale was true; how much the phantasm of a disordered mind?

He threw those rocks aside as a boy throws pebbles and he was breathless when he saw what he sought . . . some tattered rags and a scrap of old leather that the coyotes had left. There was more than that but the desert wind and the sun and the scouring winds had done their work and he uncovered only a handful of sand-scoured bones to tell whether Peyotl Gregg had lied or not. His hand hung poised over the skull that, for reasons, he hated to touch. But that skull was vital. If Peyotl told the truth that skull would be shattered.

He glanced at Peyotl, but Peyotl had got out one of his doped cigarettes and was oblivious to all. He picked up that repulsive skull and examined it carefully. If Peyotl had killed this man by smashing his head with a rock then the bones would be broken. But the skull was intact! Not till he turned it over, about to cast it aside, did he see a gaping hole in the back. Then he heard the "chink-chink" of some solid object inside it. Doubtless it was a pebble that had worked its way inside the skull. He turned the greswome object over and over in his hands. Then something dropped at his feet with a soft thud and, glancing at it, he dropped the skull with a sharp oath. There, lying between his feet, flat-

TIRED and IRRITABLE

Do you feel weak and nervous? Is your housework a burden? Take Lydia E. Pinkham's Vegetable Compound. Mrs. M. A. Kelly of Woodstock, New Brunswick, says,

"I was weak and rundown. A neighbor brought me your Vegetable Compound. It helped me so much that I am taking it now as the change."

Get a bottle NOW. It may be just the medicine YOU need.

Try Lydia E. Pinkham's VEGETABLE COMPOUND

tened as to the point, its sides scored with green verdigris, lay a forty-one caliber soft lead bullet!

With a quick little gasping oath, he picked it up and fitted it to the hole in the back of the skull. It fitted! There was no doubt about it. The man had died, not from having his head smashed with a rock but from a bullet shot through the back of his head at very close range.

He replaced all the bones except the skull, repiled the rocks and went back to the horses where Peyotl sat crouching against the wind.

"This man was shot with a forty-one caliber gun," he said.

Peyotl stared at him dully and Stone angered at his stupidity, kicked him.

"This man . . . If it's Kane . . . How'm I to know if it's Kane?" he said.

"Look at his shoes," said Peyotl with a flash of intelligence. "He allus put 'K' on the heel in iron tacks."

After long search Stone found one shoe and came back satisfied.

"Where'd you get that gun from that you shot Kane with?" he asked. At that Peyotl came to life.

"I never had a gun in my life," he said. "But when I took the gun from Mist' Sam. You got that. . . ."

"Yes, Sheriff Garcey's got it now. Who did that gun belong to?"

"I tole you I lifted it from Mist' Sam. . . ."

"And he was with you up here when . . . when Kane was killed?"

"Yeah. He sure was."

Stone stood and stared at him. He could hardly believe what he knew to be true. He turned to his pony, reset the saddle and whirled on Peyotl:

"Get into saddle at once," he snapped. "We're goin' back at once!"

CHAPTER XVIII.

Dustin's summary arrest galvanized Seco. Men gathered before every store discussing it and questioning for details. For five years Sam Dustin and Goddard had been considered immune to arrest and now Jim Garcey had taken him as casually as he might have taken any common brawler and no man knew exactly why. He met Dustin outside the Silver Dollar and touched him on the arm as Dustin stopped Doc Epps to question him about the reported death of Gerald Keene.

"I've got a warrant for your arrest, Dustin," he said. "The charge is open violation of the Narcotic Act."

"What?" Dustin spun about and his eyes snapped: "You mean that you're arrestin' me? You're crazy, Sheriff. . . ."

"Mebbe. That's got nothin' to do with the matter. The question is . . . are you comin' with me or do I have to take you?"

There was a light in Jim Garcey's eyes that spoke more plainly than any words. Dustin made up his mind at once.

"I'll come with you of course. This is absurd. Who's sworn out the warrant?"

"A man named Stone from the Hour-glass. He swears he found you with your pockets stuffed with peyotl cigarettes and Peyotl Gregg says you've kept him supplied for years."

"The . . . the lyin' hound. . . ." Dustin burst into a torrent of invective. "You mean to tell me that you're arrestin' me, a well-known citizen here, on such an absurd charge? I want to see a lawyer first of all."

"First of all, you'll come with me," said Garcey who knew that, with Dustin once locked up, he could keep him incommunicado for some time.

There was no help for it and Jim Garcey, mindful of details, did not offer Dustin the hospitality of his house as he had done with Carr. He conducted his prisoner to the only lock-up in Seco and locked him into the big steel cage behind his office with injunctions to his deputy to allow him to see no one except under special instructions.

"You're all right for the night," he said. "Water, grub'll be supplied from the Bon Ton restaurant, two books and a paper. I'll tell Bill Masters that you want to see him. He's your attorney, ain't he? By the way Dustin . . . You might be doin' some little figurin' on your own account. The penalty for murder in this State

HOW I HATED CLEANING TOILET BOWLS

UNTIL I USED

Stains flush off this easy way

Once each week sprinkle Gillett's Pure Flake Lye—full strength—into the bowl. Off come all stains without scrubbing! Kills germs, banishes odors as it cleans. Frees trap and drain pipe from obstructions. Absolutely harmless to plumbing and enamel. Get a tin today!

Never dissolve lye in hot water. The action of the lye itself heats the water.

GILLETT'S LYE EATS DIRT

FREE BOOKLET

The Gillett's Lye Booklet tells how to use this powerful cleanser and disinfectant for dozens of household tasks. Also gives full directions for soapmaking, thorough cleansing and other uses on the farm. Send for a free copy to Standard Brands Ltd., Fraser Ave., & Liberty St., Toronto, Ontario.

is hangin'. Cattle-rustlin' an' bein' accessory before the act in a shootin' case carries a stiff sentence too . . ."

With this Parthian arrow Garcey left and Dustin, appalled, stared after him. What could the man know? The very uncertainty brought the sweat to his forehead in great beads. Surely he had covered his tracks too well to have been discovered. What Garcey had said must be just a shot in the dark? He could know nothing. Even if Peyotl Gregg had told all he knew, no jury would convict a man on the testimony of one witness and that witness a drug-addict. For the charge on which he was arrested Dustin knew he would be free in a short time.

But Sam Dustin failed to remember that the day was Saturday and that Monday was May the thirtieth, a National holiday and that all offices would be closed. That three-day period gave Stone all the time he needed but it was late when he rode up Seco's main street, tired and dirty, with Peyotl sulking at his heels and scared to death. Jameson espied them first and fairly dragged Stone in his office.

"Well. . . ." said Jameson quivering with excitement.

"I got enough to convict any man before a fair-minded jury," said Stone. "Has Garcey arrested Dustin?"

"He nailed him Saturday night," said Jameson. "He'll be held a while. Dustin's squealin' like a stuck pig over what he aims to do when he gets loose and Spike Goddard is threatenin' to secede from the Union if Garcey don't run Dustin loose tomorrow. You'd better look out for Dustin when he gets loose."

There's mustard in it, but for the most part it is flour and turmeric and mustard hulls and colouring matter."

Auntie knows the difference between cheap stuff and the fine mustard grown in the Fen District of England, with all chaff and hulls eliminated, and ground D.S.F.—that means "double superfine". The only way to get the real mustard flavour and true economy is to insist on

KEEN'S D.S.F. MUSTARD

In original tins for as little as 10c.

Colman-Keen (Canada) Limited 716 1000 Amherst Street Montreal, Que.

"He'll not get loose," said Stone. "Listen to me, Jameson. . . ." And Stone told him all that had taken place and wound up by laying Kane's old shoes and the shattered skull on the desk. At sight of the skull the little editor shrank back.

"Take that thing out 'o here," said he. "I got no use for it."

"You might have use for it editin' the paper," grinned Stone. "Wait a bit, old man. I'm convinced that Dustin killed Kane. We know the motive. Kane took Dustin into the hills to show him the gold mine that he found on Hour-glass lands. Dustin didn't want to divide with Kane so he killed him and laid the blame very cleverly on that poor fool Gregg. If he'd killed Kane with that rock that he smeared with his blood, we'd never have discovered it. But he didn't. He shot him. Here's the bullet that smashed his skull. Of course we've got to show that Peyotl told the truth when he said he got the gun from Dustin when he shot Keene. Get your car and we'll run out to the Broken Spur and see if we can get Goddard to talk. If he doesn't know how much we really know, he may drop something. Get Jim Garcey too. We'll need him."

That machine slammed its way up the drive before the Broken Spur just before sunset and Spike Goddard received them with grim looks. He eyed the shrinking Peyotl menacingly though he was inwardly ill at ease. How much did these men know? What had they come for? But he ushered them into the little office and Stone played the first card.

He slapped the Derringer pistol on the desk and turned to Peyotl.

"Tell Sheriff Garcey exactly where you took this pistol from!" he said.

And before Spike Goddard could stop him, Peyotl jerked open the desk drawer.

"He kept it there," he said; "he opened it himself and showed it to me and told me about Mr. Kane . . . Keene . . . Whatever his name is. . . . Here's the green box o' cart-

ridges! I only took three of 'em. . . ."

Spike knocked him aside angrily and turned on Garcey.

"You can't come this game on me without a search warrant," he said truculently. "Get to hell out o' here every one of you."

But the damage was done and Spike knew it. The ownership of that Derringer was established. His furious gaze swung to Stone who said curtly:

"It's lucky for you, Goddard, that your partner has not implicated you in what he's done. He killed old man Kane and put the blame on that poor fool Peyotl. He drove Peyotl to shoot Keene in the Silver Dollar too. It's a big price to pay for a ranch, even as good as the Hour-glass with a gold-mine on it. Two men killed over a ranch. . . ."

"It was over that damned red-headed girl of Carr's," said Goddard

hotly. "I told him he was playin' the damned fool. . . . I told him he'd sure as hell trip himself. . . ."

Appalled at the significance of his thoughtless words he stood aghast but it was too late. Stone and Garcey and Jameson had all heard what he said and knew its dread significance. Garcey swung on him at once.

"I'll just nail you as an accessory before the fact," he said. "You'll come with me."

And before Spike Goddard knew what was happening, Garcey slipped a pair of light manacles about his wrists. The feel of the cold steel and the click of the lock struck a chill to the heart of the ranch-man. He sank into a chair and burst into shrill-voiced profanity.

"Be careful what you say," warned Garcey. "It may be used against you."

"You've got nothin' on me," snarled Goddard. "I'm not mixed up in this at all."

(To Be Continued)

The first cut in 400 years has just been made in the walls of Salisbury cathedral in England to make way for a new door in the north choir aisle. 2096

1000 PAIRS OF MONARCH DEBUTANTE SILK STOCKINGS Free!

Go to your druggist or department store and buy RIT Dye (any color, 15c-2 for 25c). Use it. Then tell us in a statement of 50 words or less, why you prefer RIT—1,000 pairs of Monarch Debutante full-fashioned—shadow-free pure silk chifon stockings—latest Spring shades—guaranteed \$1.00 value—will be given as prizes to 1,000 entrants. There are dozens of reasons why you will prefer RIT. RIT comes in 33 basic brilliant colors, from which can be produced over 50 of the newest Paris shades.

FAST COLORS WITHOUT BOILING! Only RIT offers this advantage! RIT is the modern tint or dye—easier and surer—far superior to ordinary "surface dyes" because it contains a patented ingredient that makes the color *soak in deeper*, set faster and last longer. Sold everywhere.

HOW TO WIN 1. Write a short statement (under 50 words) on why you prefer RIT Dyes and send it together with an empty RIT package (or reasonable facsimile) and your name and address, to John A. Huston Co. Ltd., 42 Caledonia Rd., Toronto. 2. Send as many as you wish; contest closes midnight June 29, 1935. 3. 1,000 prizes will be awarded on the decision of the judges, which will be final. Whether you win a pair of silk stockings or not, we will mail to all entrants free of charge, our famous booklet—"The A.B.C. of Home Rug Making".

NOT A SOAP! TINTS AND DYES RIT is a convenient scored wafer, easier to measure; won't sift out of the package.

Burnside Notes.

There will be a dance in the Lone Pine Hall on Friday evening, June 7th, put on by the Burnside Baseball team. Halliday's orchestra will furnish the music. Come and swell the crowd and help out the ball team.

Lone Pine W.I. held a very successful picnic and dance on May 24. In spite of the showery weather everybody seemed to have a good time.

Mr. Sam McAllister was a Sunday visitor at N. Eckel's.

Fred Metz spent Sunday with Allingham friends.

Mountain View Notes

Members and friends of the Mountain View W.I. held their May meeting in Community Hall.

The roll call was answered on something about Mother's Day. Mrs. Bennie StClaire read a splendid paper on Agriculture after which she acted as auctioneer of a miscellaneous sale of goods held for the purpose of raising funds.

Several of the members acted as hostesses.

The June meeting is to be held at the home of Mrs. Ernie StClaire.

Oldtime Sunnyslope Resident Passes Away.

The many friends of Mrs. Marion Fanny Nelson, wife of Mr. W. T. Nelson, secretary of Stauffer M.D., were sorry to hear of her passing away on Sunday, May 19 following several months' illness.

She was one of the first residents of Sunnyslope and took a great interest in the community life, being remembered by all for her kindness and charitable spirit.

The funeral took place last Wednesday afternoon, conducted by Rev. Selwyn Evans of Acme, and interment was made in the Three Hills cemetery.

\$225,000 Will Be Spent Upon Mountain Road.

Minister of the Interior T. G. Murphy told the House of Commons on Monday that \$225,000 will be spent this year upon the Jasper-Lake Louise Highway. The money will be provided in the \$33,000,000 construction bill.

Doings Of Our Neighbors.

AT INNISFAIR: A children's playground which was sponsored by the Knights of Pythias was opened last Wednesday. A big turnout of citizens and over 500 children were present at the opening.

LOCAL & GENERAL

W. G. Liesemer and Clint Reiber motored to Wetaskiwin on Monday

Mr. Frank Raymond visited his home at Lacombe last week-end.

Mr. and Mrs. J. McCloy returned on Sunday from a motor trip to Manitoba.

Stewart Tighe and Garnet Tighe will leave on Saturday for a motor trip to Peterborough, Ont.

Mrs. Albert Meston of Lacombe is visiting her parents, Mr. and Mrs. D. Geiger this week.

Mrs. W. A. Austin spent the week-end at their cottage at Sylvan Lake.

Misses Ruby and Irene Kercher are visiting at their home for a few days.

A Social Credit meeting will be held at Elkton tomorrow (Friday) evening, the speaker being Mr. C. W. Johnson.

A Social Credit Picnic and Rally will be held at Bergen on Monday. Mr. H. F. Pryor will address the gathering.

Allan Gole leaves today for a combined business and pleasure trip to his old home at Kitchener, Ont.

Mr. Andy Sheline, of Three Hills, Liberal candidate for the Didsbury constituency was in town on Wednesday.

Miss Jessie McCoy received word last week that she had been successful in passing all her examinations at the University.

Mrs. Huget and Miss Nelda Huget went to Sylvan Lake on Friday to spend the holidays with Miss Aleda and Dorothy Huget.

Mr. E. G. Ranton motored to Edmonton on Sunday and returned Monday accompanied by Mrs. Ranton, who had been visiting relatives in the capital city.

Among the appointments made at the Alberta Conference of the United Church held at Calgary was that of Rev. A. J. Mitchell to the church at Macleod and Rev. A. E. Hayes to the church at Jasper.

Mrs. (Dr.) Reid of Calgary was the guest of Mr. and Mrs. A. G. Studer over the holidays, at their home here and at their cottage at Sylvan Lake. She returned home Monday.

Mr. and Mrs. Tom Collinge left on Wednesday for Chatham, Ont. where they will visit Mrs. Collinge's parents. They will motor back with a new Chev. which they will pick up at the factory at Oshawa.

William Aberhart will not be a candidate in the forthcoming provincial election. At the Calgary Social Credit nomination it was announced that the leader was to be left free to travel where he was required. It is understood that a successful candidate will later give up their seat to him.

Miss Brannigan of Toronto is conducting a demonstration of the products of Standard Brands Ltd. at Halliday's Grocery this week. She is serving tea, rolls, cake etc. and is pleased to explain the merits of Magic Baking Powder, Fleischmann's Yeast and Chase and Sanborne's tea and coffee.

Things To Remember

A dance will be given at Springside School on Friday, May 31st. The Halliday Orchestra with good music and real pep assure a good time.

The Postponed Silver Jubilee Celebration—Monday, June 3rd. Come to town and enjoy a short respite from your labors.

Amendment to Dominion Farm Loan Act

Under the amended Dominion Farm Loan Act, 5 per cent will be charged on first mortgages and 6 per cent on second mortgages. \$80,000,000 are available and all the provinces are included. Loans cannot exceed 50 per cent of land value, with a maximum of \$5,000.
